DATE MAILED: 08/10/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

## Office Action Summary

**Application No.**

09/805,891

**Applicant(s)**

ANDO ET AL.

**Examiner**

HUY T. NGUYEN

**Art Unit**

2616

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 25 May 2005.  
2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.  
3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

- 4) ☒ Claim(s) 27,37,38,40,41 and 44 is/are pending in the application.  
4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.  
5) ☒ Claim(s) \_\_\_\_\_ is/are allowed.  
6) ☒ Claim(s) 27,37,38,40,41 and 44 is/are rejected.  
7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.  
8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

### Application Papers

- 9) ☐ The specification is objected to by the Examiner.  
10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).  
11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

### Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).  
a) ☐ All b) ☐ Some \* c) ☐ None of:  
1. ☐ Certified copies of the priority documents have been received.  
2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.  
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).  
\* See the attached detailed Office action for a list of the certified copies not received.

### Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)  
2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)  
3) ☒ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)  
Paper No(s)/Mail Date 6/28/05.  
4) ☐ Interview Summary (PTO-413)  
Paper No(s)/Mail Date. \_\_\_\_\_.  
5) ☐ Notice of Informal Patent Application (PTO-152)  
6) ☐ Other: \_\_\_\_\_.

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claim 38 is rejected under 35 U.S.C. 102(e) as being anticipated by Kim et al (6,470,135) .

Regarding claim 38 , Kim discloses an apparatus (Figs. 1, 3-5), column 3, lines 15-68) for recording and reproducing information on and from a recording medium , the recording medium information comprises data area for storing the steam data (column 3, lines 30-50) , the stream data comprises a third data unit define a stream object , second data unit defines a stream object unit and first data unit defines a data packet of transport packets , the second data unit includes header information including time- related information (arrival time stamp information) of the first data unit area unit (Fig. 3) . An arrival time block is considered as a header for a packet since

the arrival time is placed at the front of a corresponding data packet and used for controlling the corresponding packet.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

4. Claims 27, 37-38, 40-41 and 44 rejected under 35 U.S.C. 103(a) as being unpatentable over Yoo et al (6,5543,086) in view of Yoo et al (6,701,059).

Regarding claims 27, 37-41 and 44, Yoo (6,5543,086) discloses an apparatus (Figs. 1-5), columns 2-3) including means for recording and reproducing

Art Unit: 2616

information on and from a recording medium , the recording medium information comprises data area for storing the stream data (Fig. 3) , the stream data comprises a third data unit define a stream object , second data unit defines a stream object unit or sector) and first data unit defines a data packet of transport packets , the second data unit includes a header (application header) just before information the pair of the reception time ( arrival time) and a packet (Fig. 3) and a management are (Fig. 4) for managing the access of the units .

Yoo (6,5543,086) fails to teach that the application header includes the reception time related information .

Yoo (6,701,059) teaches a recording/ recording and reproducing apparatus (Figs. 1-3) for recording the stream data formed by a third unit including a second unit (sector) and first unit and the second unit having a application header including reception time related information just before a pair of reception time information and a packets ( Figs. 2-3, column 3) .

It would have been obvious to one of ordinary skill in the art to modify Yoo (6,5543,086) with Yoo (6,701,059) by providing the apparatus of Yoo (6,5543,086) with a reception time related information generating means as taught by Yoo (6,701,059) for generating the reception time related information for the header of the second unit thereby accurately access the data units.

Further for claims 38 and 41, Yoo (6,5543,086) teaches reproducing means for reproducing the recorded data from the medium (Fig. 1, column 2) .

5. Claim 38 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hiroshima et al (5,801,781) in view of Lenihan ( et al (6,169,843) and Miwa (6,285,825).

Regarding claim 38 , Hiroshima discloses an apparatus (Figs, 5-7, column 6) for recording and reproducing stream information on and from a data area of recording medium (column 13 lines 60-68, column 14, lines 47-50), the stream information comprises a third data unit defines a stream object ( stream program) , the third data unit comprises a second data unit defining a data unit of a stream object unit (a pack) , the second data unit comprises a first data unit defining a data unit of a transport packet (Figs. 6,7) , the second data unit includes a header information ( presentation time stamp and decoding time stamp ) including time- related information of the first data unit.

Hiroshima fails to teach using reception time with a data pack.

Lenihan teaches a recording and reproducing apparatus for recording stream data on a medium having a reception time stamp providing means for providing the data pack with a reception time information (arrival time stamp ATS) (column 7, lines 30-40, column 8, lines 1-6, Fig. 7) .

It would have been obvious to one of ordinary skill in the art to modify Hiroshima with Lenihan by providing the apparatus of Hiroshima with a reception time stamp as taught by Lenihan for providing each of data pack with a reception time stamp thereby accurately accessing and processing the data .

Hiroshima fails to teach recording management information in a management area of the recording medium .

Miwa teaches a recording/ reproducing apparatus having a control means for generating management information used for accessing the stream object and for recording the management information in a management area of a medium that is different from a data area (Fig. 14, column 16, lines 30-65) and using the management information for accessing the recorded data units in a reproducing mode .

It would have been obvious to one of ordinary skill in the art to modify Hiroshima with Miwa by providing the apparatus of Hiroshima with a control means as taught by Miwa for generating management information and recording the management information in a management area different from the data area in order to facilitate accessing the stream information during a reproduction mode .

### ***Response to Arguments***

6. Applicant's arguments filed 5/25/2005 have been fully considered but they are not persuasive.

In remark applicant argues that Kim and Lenihan fails to teach the header information of the second data unit is "just before the reception time information of the first pair of the first data nit and reception time information . In response , it is noted that applicant's argument is not recited in claim 38.

***Conclusion***

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to HUY T. NGUYEN whose telephone number is (571) 272-7378. The examiner can normally be reached on 8:30AM -6:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Groody can be reached on (571) 272-7950. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
